CARE & MAINTENANCE
GAMECOURT® PVC SPORTS FLOORING
Revised 4-14-09

The GAMECOURT® PVC sports flooring, like all quality floor surfaces, requires consistent cleaning and scheduled maintenance to ensure that it stays looking great. The schedule for cleaning depends on many factors including – various activities, how often the floor is used, and the volume of foot traffic on the floor. The more consistent the cleaning schedule, the better the appearance of the floor. The following general guidelines will help to keep your new GAMECOURT® PVC floor looking great.

INITIAL CLEANING

1. Sweep or vacuum the entire floor surface to remove all loose dirt, dust and foreign objects.
2. Scrub the entire area with an automatic scrubbing machine (150-350 rpm), equipped with a red nylon pad or with soft nylon bristle brushes. If an automatic scrubber is unavailable you may use a low speed (150-350 rpm) flooring buffer and a wet vac. Apply a cleaning solution comprised of a pH 9 to pH13 cleaning detergent (a list of approved detergents can be found at the end of these instructions) and warm water. Follow the instructions found on the detergent's label for concentration and mixing. Apply a liberal amount of cleaning solution and let soak for 10 to 15 minutes (longer if needed). Do not vacuum or pick up cleaning solution on the first pass of the scrubber.
3. Beginning where you first started and while applying more cleaning solution, scrub the entire floor at a slower rate and vacuum the dirty cleaning solution on the second pass. Do not allow the cleaning solution to dry on the floor between passes, if this occurs reduce the size of the area you are cleaning or apply more cleaning solution. Allowing the dirty solution to dry on the floor between passes will only make the cleaning process more difficult.
4. Perform a clean water rinse by using the automatic scrubber and replacing the cleaning solution with clean, warm water. Lightly scrub the entire floor and vacuum the used rinse water. It is important that all cleaning solution residue be removed by rinsing.
5. Check the area, some stubborn marks may have remained on the floor. Remove these marks by using a cloth dampened with pure cleaning detergent, denatured mineral spirits or a non-flammable cleaning solvent. Rinse with clean water and dry. Do not allow these cleaning products to remain the floor for an extended period of time since they may damage the floor.
6. Do not scrub the floor with hard polyester or nylon pads, steel wool, wire brushes, or abrasive floor cleaners. These types of materials can severely scratch and damage the surface of the floor as well as prematurely wear the game lines.
7. Do not apply any type of floor sealer, finish or wax. Application of these products may void your warranty.
8. Do not scrub the floor with hard polyester or nylon pads, steel wool, wire brushes, or abrasive floor cleaners. These types of materials can severely scratch and damage the surface of the floor as well as prematurely wear the game lines.
9. Do not apply any type of floor sealer, finish or wax. Application of these products may void your warranty.

DAILY MAINTENANCE

1. Maintenance of the GameCourt PVC sports flooring is a daily procedure. Daily maintenance is very important to ensure the long life and appearance of the floor and reduce periodic maintenance. It can be helpful to put

walk off mats at all entrances to help remove abrasive dirt and grit from shoes. In order to avoid staining the floor use only vinyl backed mats. Certain types of rubber or rubber-backed mats can stain GameCourt PVC.

- Dust mop the entire floor. You may treat your dust mop with Hillyard Hil-Mist or equal. Do not use oil treated mops or brooms.
- You may wish to spot clean obvious marks. Most heel marks may be removed by rubbing using a dry, white nylon pad. Remove other marks by using pure cleaning detergent, denatured mineral spirits or a non-flammable cleaning solvent. Rinse with clean water and dry. Do not allow these products to remain on the floor for an extended period of time since they may damage the floor.

PERIODIC MAINTENANCE (Lightly soiled or frequently washed floors)

- Dust mop the entire floor as instructed in the Daily Maintenance section.
- If the floor is generally clean but heel or scuffmarks are prominent you may elect to dry buff the floor using a white nylon pad attached to a low speed (150-350 rpm) flooring buffer. This will remove the great majority of marks. Dust mop the floor before and after buffing. **OR**
- Clean and scrub the entire floor using an automatic scrubber equipped with a white nylon pad. Use a mild, pH neutral detergent (a list of approved detergents can be found at the end of these instructions). Mix the cleaning solution according to the manufacturer's instructions. Utilizing only one pass of the scrubber, dispense a liberal amount of cleaning solution, scrub the floor and vacuum the dirty solution. Use this cleaning method for floors that need to be washed on a daily basis, such as floors used in gym/cafeterias.

PERIODIC MAINTENANCE (Heavily soiled or infrequently washed floors)

- Use the cleaning procedure outlined in the Initial Cleaning section.

MISCELLANEOUS

- Remember maintenance is a daily procedure; daily maintenance will extend the useful life of the floor.
- Your GameCourt PVC floor has a special reinforced polyurethane surface treatment. This treatment eliminates the need for sealers, finishes or waxes to the floor. Therefore it is important that you do not apply any type of sealer, finish or wax to your GameCourt PVC Sport Floor. Application of these products may void your warranty.
- GameCourt PVC Sport Flooring is very resistant to staining and chemicals. However dirt and spills should be removed as promptly as possible. Certain materials can cause damage such as organic solvents (i.e. acetone, fingernail polish remover, etc), petroleum based products (i.e. oil, gasoline, tar, etc.) rubber pads, mats and wheels. Certain rubber compounds may stain the floor with prolonged exposure. Wheels on equipment should be plastic or composition and should not be metal.
- Please consult you local GameCourt PVC installer or distributor if you have any questions. These maintenance procedures and technical assistance offered by your local GameCourt PVC representative are your only guarantee that the procedures and products used on your GameCourt PVC floors are the proper ones. Please note that unapproved maintenance procedures and/or products may void your GameCourt PVC warranty.
- CAUTION: Phenolic Type Disinfectants are very caustic and may cause adverse effects to the physical properties of the floor covering, including leaving a slippery residue, which may cause a hazardous condition. If phenolics are used, after each application, thoroughly rinse the surface with clean water and wet vac the solution. Moose Sports Surfaces Ltd does not recommend the use of phenolics and will not warranty any damage or harm caused by their use.
